## Consent Form for CSE340 Menus Experiment

### Introduction and Purpose of study

This study is about examining how different computer menu designs affect the speed and accuracy of users in selecting menu items. The purpose of this specific experiment is to determine which types of menu designs allows users to select items more efficiently.

### Requirements for participation

To participate in this study, you must be 18 years or older and be able to see and physically interact with objects on a screen.

### Study procedures

You will complete a series of menu selections during this study. You will need to click on 108 menus to complete the session as mentioned above. You should expect this to take approximately *12 minutes*. As a participant, you will be compensated with a snack. 😊

### Voluntary nature of Study

Your participation is voluntary, and you can stop at any time without penalty. Your decision not to participate will not have an impact on your educational or social standing at the University of Washington in any way.

### Benefits of Study

This study will not directly benefit me, the person running this study. However, it will help my class to understand the principles of better design, considering the data we have gathered.

### Contact

If you have any concerns about this study, you can reach out to the Professor in charge, Professor Jennifer Mankoff, [jmankoff \[at\] uw.edu](mailto:jmankoff@uw.edu)

### Written Consent (Please fill out this section.)

I am 18 or older: Y [☒] N [☐]

I am willing to participate in this research: Y [☒] N [☐]

To protect your privacy, we are not collecting your signature. However instead please write the words "I Consent" and draw a picture of a sun next to those words below.

I consent      ☺
